SUBJECT: Sauget Lift Station

For the first time in a number of months the lift station is working properly, that is with all 3 pumps operating and controlled so that they are used alternately.

Would you have Dale arrange with Bob Odle to get some laborers to wash down the walls and generally clean up the station so that it can be painted.

I doubt that the pump seals can be kept from leaking a little, so I'd like to run a 1" hose from each of the pumps (the 3/4" drain holes) to the sump pump to keep this water off the pump base and floor.

There may have been IJA's written earlier for this work, so I did not write them at this time.
